The task of the villagers is to find out who the werewolf is and the work of the werewolf is to prey on all the inhabitants to the end. If all the wolves are caught, then the team of residents win, but if all the inhabitants die, then the werewolf team wins. This game has 2 phases, namely day and night phases. At the beginning of the game, each player does not understand the role played by different players (except werewolves, they know each other). And each player is free to express their identity to keep their identity confidential. From this there will be actions accusing him of being a werewolf. The atmosphere of the game will get hotter as they argue with each other about who the werewolf is. The pleasure of playing werewolf is to test our interaction skills. The villager's team should be good at researching who gets the waswolf role. They should be able to see through the methods of conversation, miki and body gestures to determine whether the person is telling the truth. Because residents can't randomly vote for people who will be executed. It is wrong to assume that they can be sentenced to death by fellow villagers, which will benefit the wolves. Well the werewolf must be smart in action and avoid being able to understand his personality. The legal werewolf team simply claims to be villagers and incites various residents to claim to be another werewolf. ConcludingWerewolf Internet cheats will help you get unlimited money.
